

C# Programmer

Coda Commerce are a leading software provider to SME Courier and Logistics businesses. We are looking for a programmer to join our existing development team and further the development of the applications we provide.

The role will require you to work on our WMS (Warehouse Management System) project, this is a cloud based application currently being used by 3PL organisations to facilitate the storing, location, picking /packing and distribution of items within a warehouse environment. The core of the WMS platform is hosted on Microsoft Azure with mobile applications developed on Android.

Requirements

- Strong C# fundamentals and has experience in building services and applications in C#
- Proficiency in client side scripting languages, in particular HTML, CSS, JavaScript and jQuery
- Experience with T-SQL would be extremely beneficial
- Experience with source control (SVN, GIT, Team Services etc.)

Coda Commerce is a growing and innovative company with positive and friendly working environment, we constantly look at ways of adding new functionality to our applications.

Job Role: C# Developer / C# Programmer

Location: Bracknell
